

Project Brief

Bangerter Highway Noise Wall Installation

**2007 Legislative
Update**

Provided By:

Project Description: CONSTRUCTION, Noise Wall

This noise wall project fulfills an environmental commitment made for the re striping of Bangerter Highway to three lanes in each direction from its previous two-lane configuration. The re striping took place in 2006, and runs from the I-15 interchange through approximately 11800 South. Noise walls will be built at seven locations to mitigate increased traffic noise for impacted residents.

Anticipated Schedule:

- The project has already been designed, advertised and awarded
- Construction will begin in early January.

Commission
Approved
Project Budget:
\$2.5 million

Anticipated
Schedule:
Construction –
Early 2007
